Proposal No. 22842

Redlands Unified School District  
20 West Lugonia  
Redlands, CA 92374

Attention: Mr. Ken Morse

**Subject: Proposal for Materials Testing and Special Inspection Services  
Redlands High School Terrier Gym HVAC Upgrades (DSA 04-122644)  
840 East Citrus Ave. Redlands, California**

In response to your request, we are pleased to present this proposal to provide materials testing and special inspection services for the subject project.

## **PROJECT DESCRIPTION**

Our understanding of this project is primarily based on our review of project plans prepared by PCH Architecture and DSA-103 (DSA approved on 11/14/2023). Based on our review, the project generally consists of partially replacing existing HVAC with a new system in the Terrier Gym Building SS. An estimated construction budget of \$450,000 was reported on the DSA eTracker and the project is scheduled to start in June 2024.

## **PROPOSED SCOPE OF WORK**

Our proposed scope of work will consist of materials testing and special inspection services in accordance with Chapter 17A of the 2022 California Building Code (CBC) and other recognized authorities as specified in the provided project manual. A partial list of the above disciplines or tasks are further described below:

- **Post-Installed Anchors/Epoxy Dowels (On-Site):** We will provide a special inspector to observe installation of post-installed epoxy and screw/expansion (mechanical) concrete and masonry anchors. Our special inspector will view the installation of these anchors in accordance with ICC-ES Evaluation Report, specific to anchors used. We will also provide pull, torque and/or proof testing, as necessary, of installed concrete anchors.
- **Shop/Field Welding Inspections:** Our services will consist of inspection of welding procedures and welds for conformance to approved plans, specifications, and building codes. This inspection is generally performed on a continuous basis during structural welding. The inspector may use gamma ray, sonic or any other aid that he may deem necessary to assure the adequacy of his welding inspection.

- **Deliverables:** Daily reports of testing and inspection services presenting applicable information will be prepared at the completion of each activity, and electronic copies (PDFs) e-mailed.
- **Project Management/OC:** A California licensed Civil Engineer (PE) will review all DFRs and laboratory test results, experienced staff will prepare reports for distribution. Materials concerns encountered in the field and noted in DFRs, and any material tested and found to not conform to project specifications, will be brought to the attention of the district's designated representative and your DSA designated Project Inspector. Supervision, quality, and project management will be provided by our Civil Engineer (PE) as Laboratory of Record (LOR).
- **Project Closeout:** We will prepare DSA-291 (Laboratory of Record Verified Report) form as the inspection card requires (interims) and when the project is completed (final), which will be required by DSA to properly closeout this project. These forms will also be uploaded to the DSA "Box".

## **SCHEDULE**

Scheduling of our technicians and inspectors should be done in accordance with the requirements of the Project Manual; however, we would like two working days advance notice when scheduling our field personnel at the commencement of construction; work thereafter may be scheduled with one working day (minimum 24-hour) notice. Calls to our dispatch after 3:00 pm (prior workday) or on weekends and holidays are not addressed until the first following working day, without prior arrangement. Daily field reports (DFRs) will be distributed to your Project Inspector (PI) and/or project superintendent for review and signature. We anticipate that your project superintendent or PI will be on-site to (1) schedule our personnel, (2) supervise various contractors' activities and (3) respond to deficiencies in earthwork or materials, if necessary. We will work closely with your field representative to reduce standby time or unnecessary trips to the site.

## **FEES AND TERMS**

### **Time and Expense Fee Schedule**

The actual amount of time, and our associated fees, will be dependent on weather, requests of the district and/or PI and the contractor's schedule, sequencing, pace, and efficiency. We understand that the district will approve all changes prior to cost adjustments. Our estimated budget for the above services is **\$11,845**. **A detailed breakdown of the estimated fee is included in Table 1 attached.** We assume that a Purchase Order will be issued to us before we invoice, which will reference the terms and conditions of our mutually agreed to agreement and document your authorization for this scope and fee. Any changes to the terms and conditions may require a change in the scope, fees, or both.

### Budget Assumptions

Our budget is based on normal daylight workday shifts of 8 hours per day, 40 hours per week, Monday through Friday except holidays. Overtime is not included in our budget. Overtime work (over 8 hours per day, weekends, or holidays). Our estimate does not include costs for response to project RFI's, additional field hours requested beyond those stated herein, third-party review or response to comments of any regulatory agency. Also, exclusions or assumptions from our budget estimate are:

- Site concrete inspection and testing (i.e. 2,500 psi or less),
- Shop welding inspection outside Southern California or more than 1.5 hours from project site. This will need to be updated based on the actual schedule.
- Costs of tests or inspections due to the following:
  1. Retesting because of failure of initial samples,
  2. Additional costs due to overtime work or extra work because of improper scheduling of technicians and/or inspectors, or of delivery of structural materials by the contractor without DSA required plant inspection documentation and/or mill certifications,
  3. Failure to notify our laboratory or dispatch (866-LEIGHTON) in a timely manner as required by the project manual,
  4. Retests resulting from changes in sources, lots or suppliers of materials after original tests are completed,
  5. Changes in methods or materials of construction that require testing, inspection and/or other related services in excess of that required by the original design.

### CLOSURE

We appreciate the opportunity to provide this proposal. If you have any questions or information that would update our scope, please contact us at your convenience.

Respectfully submitted,
