

THE EARTH DOME

DISCOVER GEOGRAPHY ON A SCALE YOU NEVER THOUGHT POSSIBLE!

"The Earth Dome has become a beloved yearly assembly for our first graders. Thank you for consistently bringing a valuable geography experience to our students."

- Glenwood Elementary, Short Hills, NJ

The Earth Dome is a gigantic inflatable earth balloon standing 19-feet high and 22-feet in diameter. It's made of 24 huge panels silkscreened with photographs shot from satellites of the surface of the world on cloud free days. It has been used extensively across the United States to educate students about geography as well as environmental issues.

Although, the visit to The Earth Dome is just a 30-minute assembly, seeing and understanding the Earth as it appears from space, as opposed to painted globes or drawings, is an experience not soon forgotten.

This assembly allows for up to seven half-hour assemblies in which 35 to 45 students (depending on grade level) and one teacher will have a presentation both outside as well as inside the balloon. They will see and better understand the scale of concepts such as continents, time zones, latitude, longitude, and more! Even major cities in comparison to the total earth will be recognized. These topics are presented to each class at the appropriate grade level.

STEAM MUSEUM

PORTABLE HANDS-ON MUSEUM

"Thank you so much. The program was amazing and our students and families enjoyed it fully. Kids were amazed with the robot and so excited when it started talking and moving"

- KIPP Lanning Square Primary, Camden, NJ

What if you could bring the experience of visiting a science museum right to your school?

Wouldn't that be great? Being able to save on not only admission costs, but transportation fees as well? Not having to deal with the hassles of permission slips or taking an entire day away from your curriculum requirements? Well, now you can.

Say hello to Mobile Ed's STEAM Museum. This comprehensive update over our original nationwide hit STEM Museum is ready to turn your gymnasium or multipurpose room into a state-of-the-art hands-on children's museum focused on STEAM education (science, technology, engineering, art and math). With activities suitable for all ages, you'll find workstations to not only augment your existing science and math curriculum, but you will also expose your students to high-tech fields of study they never before had access to. In addition, we put the A

in STEAM by opening up your student's right-brains through activities that encourage divergent thinking.

The STEAM Museum has something for all grade levels and interests. Students are encouraged to explore the museum at their own pace and manage their time between stations that appeal to their individual interests. Adult supervision from the Mobile Ed presenter and parent volunteers will be present at some of the stations to focus the students and to positively enhance the experience with small group instruction.

STEAM Museum truly has something for everyone! From building an arch to programming a robot to 3D printing, we bring experiences your students might not ever have had before right to your doorstep – and plenty of them! With so much to do, you might need a second visit to see it all.

SKY DOME PLANETARIUM

ARE YOU READY TO BLAST OFF?

"Perfect learning "virtual field trip" for our science standards! Since gas price hikes, field trips have been cut back. This program took kids to a planetarium setting right here at school."

- North Oakview Elementary, Grand Rapids, MI

Take your students on a 45 minute journey through the universe from the comfort and security of your own school. Our portable, inflatable planetarium will come right to your location and dazzle your budding astronomers as they are taken on a tour of the solar system.

Students will enter the dome and be introduced to a "star filled" sky. Our navigator with the use of a digital planetarium projector and a laser pointer, will guide students through the stars of the Northern Hemisphere exactly as they appear on the day of the presentation.

Students will learn how to identify every planet in our solar system in dramatic "flights" towards each world. They will be introduced to Greek mythological characters and see how these heroes of the past can be found in the stars. Students will witness the night sky in different seasons and from different global perspectives.

The Sky Dome Planetarium can be quickly and easily set up in most gymnasiums or other large rooms with a high ceiling. It has delighted students in thousands of schools throughout the country and we are confident that you will be thrilled by the excitement and enchantment this program offers. All presentations are tailored for each age group (K-8) and will provide appropriate academic content. The dome is also handicapped-accessible.

PROGRAM SUMMARY
